# **Ad campaign against mandatory overtime**

The FIQ launched its ad campaign against mandatory overtime on August 20<sup>th</sup>. This campaign highlights the serious impacts of MOT on the daily lives of the healthcare professionals, and that of their families and loved ones. Five clips will be on the FIQ's social networks, Facebook page, Instagram account and Twitter. By clicking on the ad, you will be redirected to a FIQ web page devoted to MOT. You are invited to comment and share the ads mentioning how MOT affects your daily lives in order to maintain the political pressure to get MOT stopped. We must continue to denounce MOT.
